

Downloading Google Earth for Mac Users

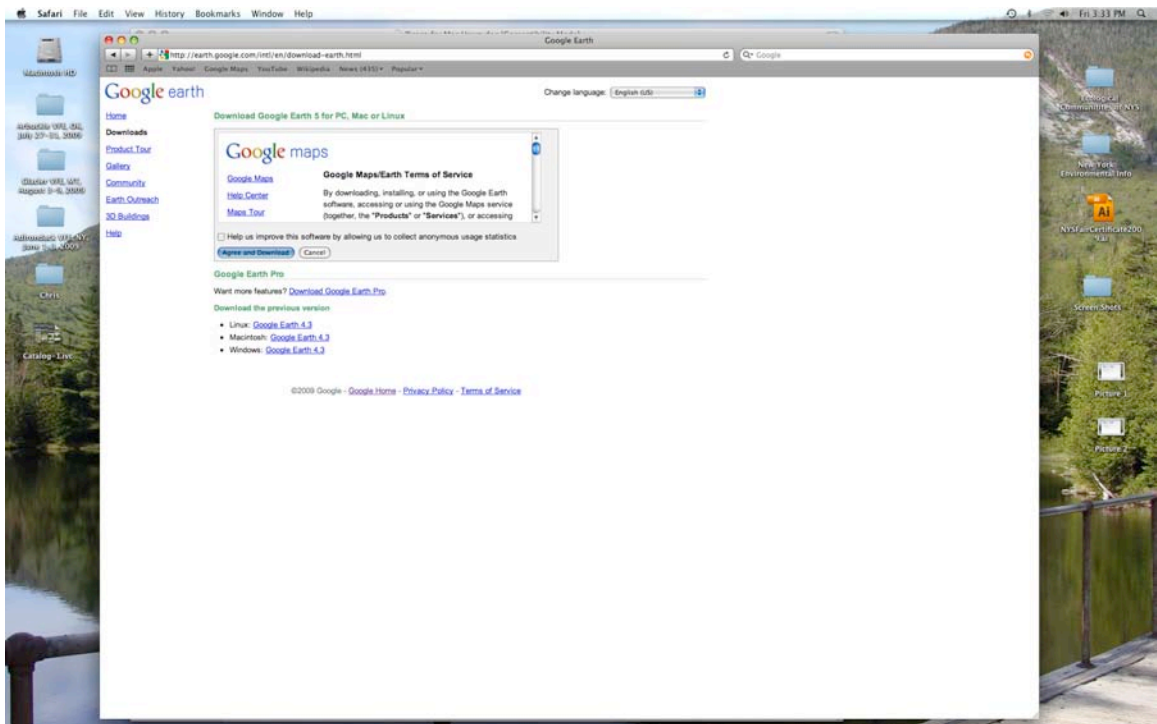

1. Go to <http://earth.google.com/>.

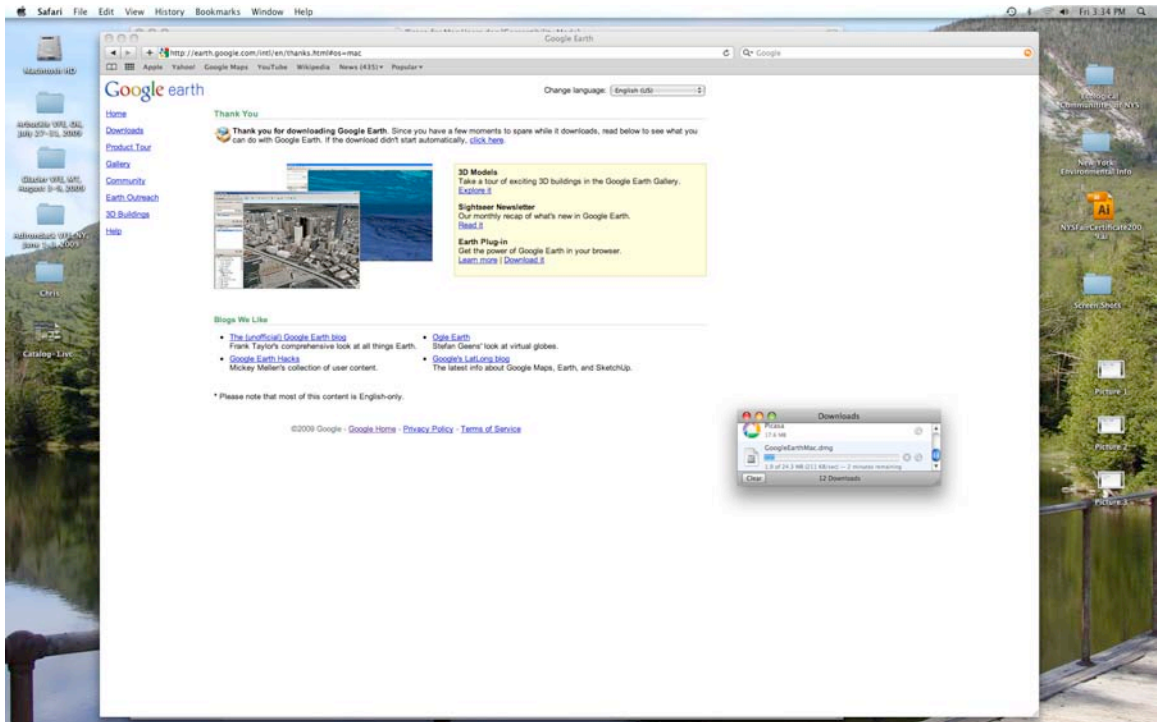

2. Click on "Download Google Earth 5".

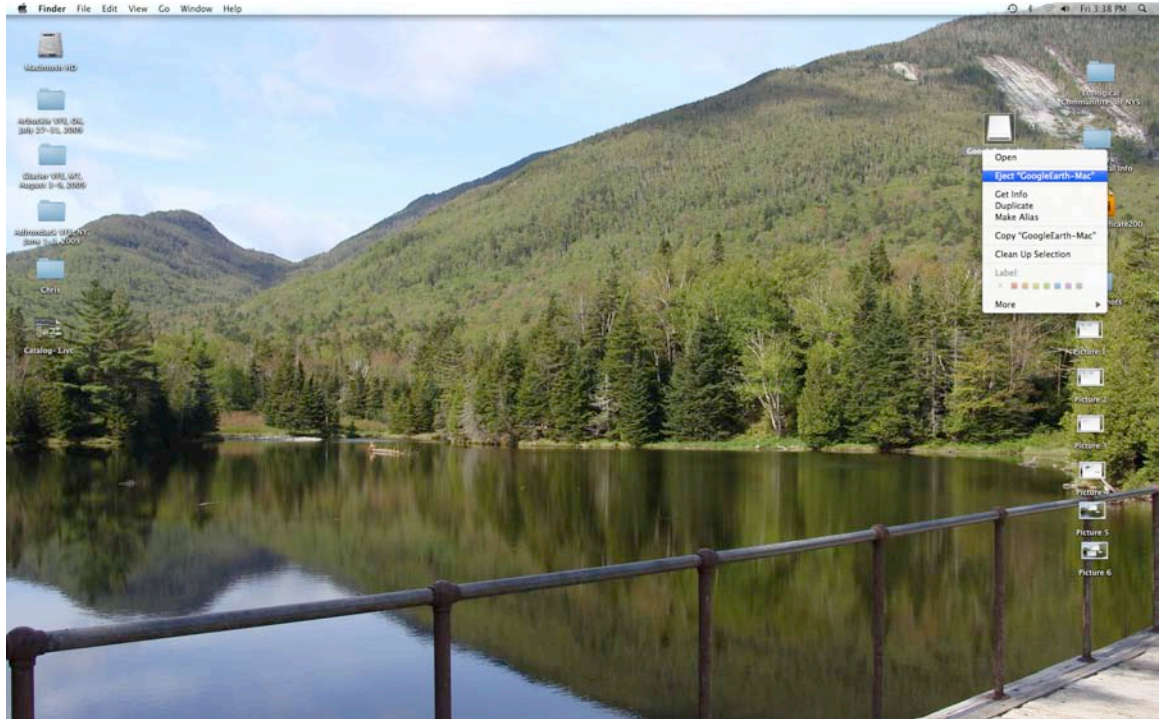

3. Click on “Agree and Download”.

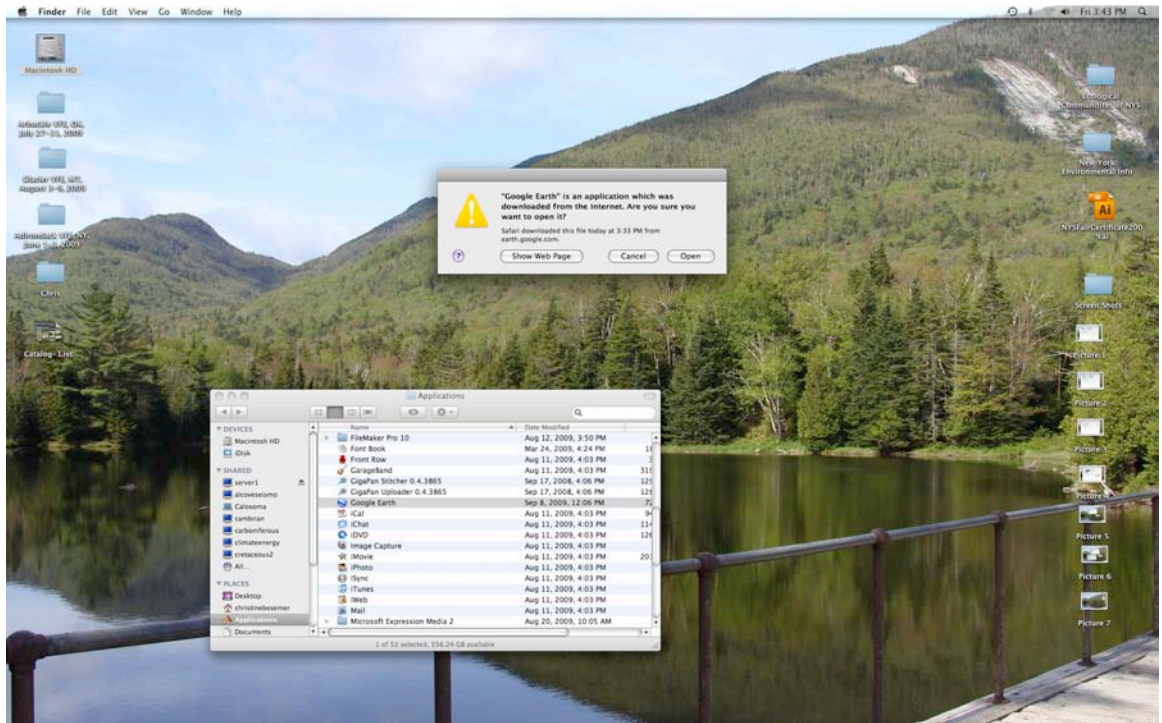

4. Wait for the program to download. Time will vary depending on your machine and your Internet speed.

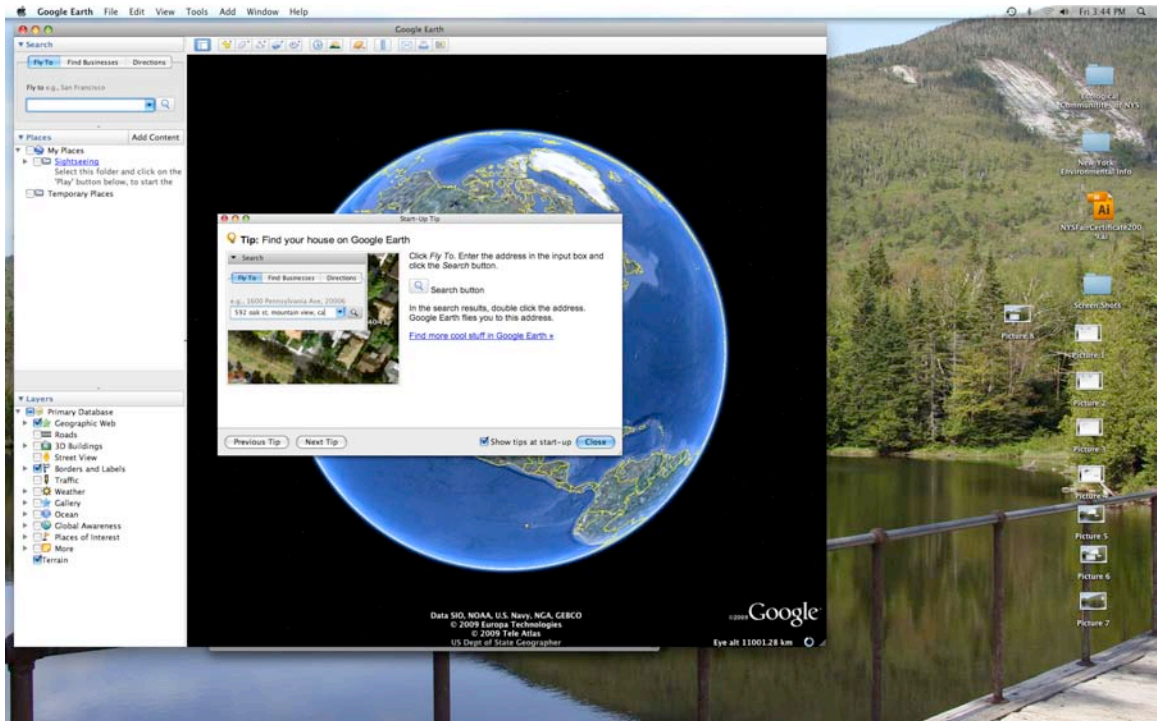

7. Right click on the “Google Earth-Mac” icon on your desktop. Choose “Eject Google Earth-Mac” to eliminate the icon from your desktop. Because you have already moved Google Earth to the Application folder you no longer need this icon on the desktop.

8. Open Google Earth from the “Applications” folder.

9. A screen asking if you would like to open the application that has been downloaded from the web will appear. Click “Open” to open Google Earth.

10. You have successfully downloaded Google Earth!
